

MoonMafia

White Paper

"Where justice does not work, you provide your own justice"

WHAT IS WHITE PAPER ?

“White paper” is intended to be used as a pre-sales marketing tool and not as a user manual or other technical document developed to support the user after a purchase.

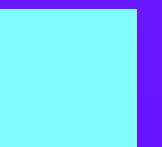

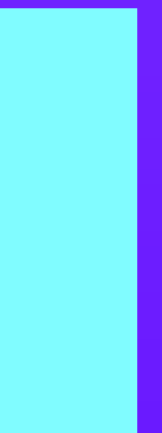

In particular, every Initial Coin Offering (ICO) in the cryptocurrency market needs a white paper to run a successful campaign. In this context, “white paper” is an important document that describes the outline of a problem that the project wants to solve, its solution, a detailed description of its products, its architecture, and how it will interact with users.

INTRODUCTION / INFORMATION

MoonMafia is a BEP20 token running on the Binance Smart Chain. There were no pre-sales or special allocations. Initial liquidity was locked with DxSale for 1 year.

MoonMafia is not a meme token. It is an NFT-based project that has real social responsibilities and is struggling to make it happen with talented teammates. The total maximum and circulating supply of MoonMafia token is 1 Quadrillion, which you can see by checking the contract source code of the BEP20 token on bscscan.

ABOUT MOONMAFIA

MoonMafia is an anti-drug social responsibility project. The project will be handled as an NFT-based, and we will display the designs from NFT artists on our website and offer them for sale in the online events we will organize. Most of the proceeds will be used to treat drug addicts and fund anti-drug associations. For this, we will cooperate with the world's leading addiction associations.

Our NFT sales on the website will be done on MoonMafia token, thus making the MoonMafia token a fast rising and high earning coin. We will promote MoonMafia tokens through online organizations and addiction associations to increase our number of holders and appeal to more audiences.

NFT MARKETPLACE

NFTs are virtual tokens that represent ownership of something inherently distinct and scarce, whether it be a physical or digital item, such as artwork, a soundtrack, a collectible, an in-game item or real estate. Unlike regular cryptocurrencies like bitcoin or fiat money like the U.S dollar, these special types of digital assets cannot be mutually exchanged for one another because each token has a specific value based on its unique traits and attributes.

Also unlike regular cryptocurrencies, NFTs cannot be purchased on centralized or decentralized crypto exchanges. Instead, they are listed and traded on online marketplaces that are specially built for NFTs.

NFT Artist

An NFT is a digital asset that exists completely in the digital universe you can't touch it, but you can own it. An NFT can be any type of digital file: an artwork, an article, music or even a meme such as "Disaster Girl", the original photo of which sold for \$500k earlier this year

Although a single person owns the original of NFT, in many sales, the artist continues to own the copyrights of his work, thus retaining the rights to sell copies of it. NFTs can also contain smart contracts. They may include rights to an artist, for example, to receive a share of any future sale..

NFT Swap

Unlike NFTs, cryptocurrencies such as Bitcoin or ethereum can be exchanged for each other, just like the banknotes we use in our daily lives, but NFTs cannot be swapped because they are unique.

Thanks to the software we have developed as MoonMafia, users will be able to easily exchange nft swap themselves.

If the user wants to exchange the NFT work with another artifact, he/she will make an offer to the other party for the item he/she wants to exchange. If the offer is accepted, both artifacts will be secured by MoonMafia and then the artifacts will be exchanged.

NFT Awards System

The NFT rewards program will be held once a week.

The only requirement to participate in the awards program is that the artist has sold at least one NFT during the week of the program. If the artist has sold more than one NFT, he can participate in the program with a work of his choice.

In order to vote for the works in the award program, the MoonMafia token must be available and only one vote is made from a single wallet.

70% of the award will be distributed to the winning artist and 30% to those who voted for this work.

HOW IT WORKS ?

It is built on the MoonMafia token bsc (Bep20). Aiming to use the developing blockchain technology in the fight against drugs, which is a serious problem in the world, and to support charities, the MoonMafia team will build an nft marketplace for its Owners. The revenue of nfts sold on the nft market will be shared with charities on a regular basis.

There are more than 59 million known drug addicts in the world. The MoonMafia team, which will support especially the war on drugs organizations. It will be in constant communication with social responsibility associations, and various activities will be organized to raise awareness of the fight against drugs in various parts of the world in the later stages of the project..

BENEFITS OF USING MOONMAFIA

Why to choose MoonMafia?

MoonMafia is a Binance-based decentralized exchange protocol. The Binance smartchain does not need any external dependencies to run.

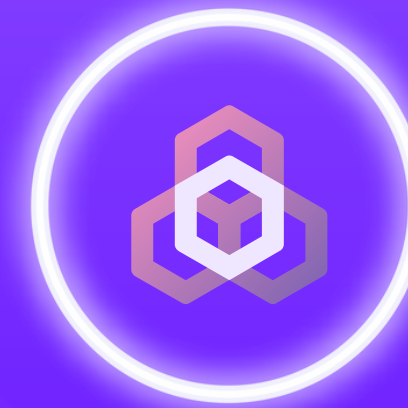

Peer to peer network

Utilizing the power of the global community and the sharing economy to tear down the barriers and revolutionize the old & inefficient financial systems.

Smart Contract

The objectives of smart contracts are the reduction of need in trusted intermediators, arbitrations and enforcement costs, fraud losses, as well as the reduction of malicious and accidental exceptions.

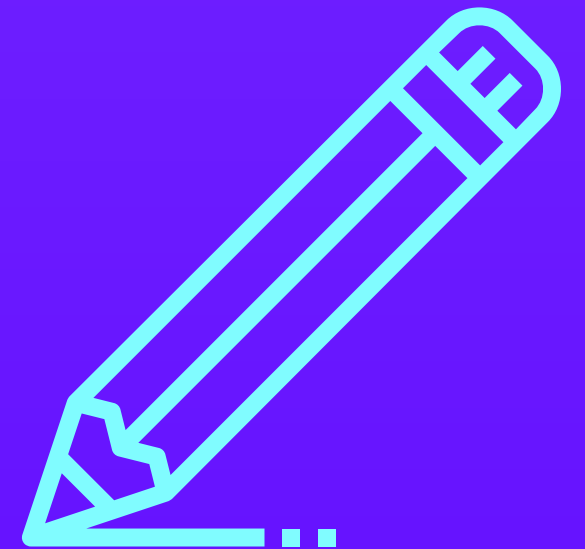

Store

We will build MoonMafia with a real purpose instead of aimless projects, and turn it into a token that will earn its investors.

PLANS FOR THE DEV WALLET

At the beginning of the project, 85% of the total supply will be kept in the warehouse. Developer Wallet to activate “MoonMafia Burns”. We performed the first 5% burning process at the opening. As MoonMafia liquidity increases, the remaining Moonmafia tokens in the developer wallet will continue to be burned manually piecemeal.
